The Connecticut Transportation Institute’s Technology Transfer Center, established at the University of Connecticut’s School of Engineering in 1983, provides training, technical assistance and informational materials to Connecticut’s local governments on the planning, design, construction, maintenance, operation and management of roads, bridges and public transit.

The Technology Transfer Center is a cooperative effort of the Connecticut Department of Transportation, the Federal Highway Administration’s Local Technical Assistance Program (LTAP) and the University of Connecticut.
Course Description:
This training is designed to help local road agency professionals understand the critical relationships between roads, roadside, road user behavior and safety. The course focuses on identifying safety problems and solving them through the use of safety countermeasures.

This one day course provides methods for implementing effective safety improvements on local roadways. It emphasizes the basic and enhanced application of traffic control devices and systematic safety improvements.

Connecticut case studies, utilizing the Federal Highway Administration’s proven safety countermeasures, will be presented to enhance the learning experience.

A presentation will also be given on the new CT Crash Data Repository and the CT Electronic Crash Reporting initiative.

Instructor:
Mark Hood, P.E. is a Senior Technology Transfer Specialist and Traffic Safety “Engineer with Pennoni Consulting Engineers and the Pennsylvania LTAP Center. He has over 20 years of experience in Transportation Engineering and has been providing training and technical assistance to audiences around the country for the past fourteen (14) years.

Who Should Attend:
This program is designed for any transportation and public safety professionals responsible for roadway safety. Public Works Directors, Highway Superintendents, Road Foremen, Legal Traffic Authorities, Police Chiefs and Traffic Sergeants are encouraged to attend.

Course Learning Objectives
After completing this course, participants will be able to:
- Understand why road safety is important
- Understand and recognize the symptoms and causes of road safety problems
- Apply road safety improvement concepts to enhance road safety in your community
- Develop a preliminary plan to improve road safety in your community, including prioritizing your safety issues and identifying stakeholders
- Describe the benefits of the new Connecticut Crash Data Repository and E-Crash Initiative

Registration Fees:
The registration fee for State and Municipal participants is $75.00; the registration fee for private sector participants is $150.00. The registration fee includes lunch and workshop handouts. Registration fees are due prior to the start of the workshop.

Participants from the Connecticut Department of Transportation must provide the CT DOT workshop voucher number with the registration form and bring the original voucher to the workshop.

Refund Policy:
The registration fee is refundable if notice of cancellation is received 48 hours prior to the start of the program. Registrants who are unable to attend and do not cancel in advance are subject to the registration fee.

Substitutions may be made at any time. Please notify us of changes.

Registration:
Registration is closed one week prior to the day of the workshop. Mail your form, fax your form to (860) 486-5718 or register online at www.t2center.uconn.edu/registration.php.

Please Note: We will be emailing travel directions and parking information prior to the training date. Please be sure to provide an email address on your registration.

Enrollment is Limited:
Registrations will be accepted on a first-come first-served basis. Please register early for this workshop.
