BRIDGE MAINTENANCE FOR LOCAL AGENCIES

CT Technology Transfer Center

Presents:

A Road Master Program Elective

Description: This presentation is an overview of the various types of bridge designs, the different parts, components and function of structures and the importance of maintenance of these components. The session will stress the importance of maintenance and how to look for potential problem areas. This is not intended to replace the NBIS (National Bridge Inspection System) certification program.

Intended Audience: This program is intended for supervisors, field crew members and elected officials who are responsible for the maintenance of local highway bridges.

Upon Completion, participants will be able to:

- Understand the importance of routine maintenance
- Discuss various maintenance repair methods
- Identify critical locations for bridge maintenance

The Instructor: *John Hopkins* has over 38 years experience in construction and maintenance on projects such as highways, bridges, automotive assembly plants, high-rise buildings and nuclear power plants. He has been providing on-site assistance and training programs to local transportation agencies for over 25 years. He has provided technical assistance and training both nationally and internationally. He has been requested by the Federal Highway Administration and the National Highway Institute to serve as a consultant on developing training programs for local agencies each year since 1982. He presents the training in a straightforward manner to all levels of agencies.

REGISTRATION – Bridge Maintenance

Please reply by **June 3, 2008**

I will attend: ___ June 12, 2008 – East Lyme, CT ___ June 13, 2008 – Torrington, CT
