Traffic Signal Camera Systems: A Roundtable Discussion

A CT Traffic Signal Academy Workshop

As technology is developed and becomes more readily available for use, municipalities must consider how to integrate it into municipal systems. Camera systems provide an opportunity to gather a tremendous amount of data but also require additional resources to operate the systems and collect and analyze that data.

This roundtable discussion will provide details on the technology itself as well as some examples of how towns and the state are using this technology to enhance the management and operations of their signal systems.

Who Should Attend:

This discussion is open to those who are responsible for making decisions regarding municipal and state traffic signal systems and those responsible for the operation and maintenance of those systems.

Municipal and state traffic engineers and technicians are encouraged to attend.

Date & Location

December 11, 2018
Cheshire, CT

Session is 8:30am—12:00pm
(Registration begins at 8:00am)
Morning refreshments will be provided

Agenda

8:30am  Introductions
8:45am  Jeffery Price
